- Blender
- After Effects

Hand-off

- Figma

WORK EXPERIENCE

August 2023 - December 2024

Junior Product Designer - Munich, Germany

Epilot GmbH

Epilot is a scale-up customer management SaaS in the renewable energy sector. Some achievements from my time working at Epilot involved:

- Designed illustrations for a white label product which enabled energy clients to improve their customer acquisition. The success of mvp resulted in further investment of the white label product
- Designed and created a white label low code tool for energy companies to improve their customer acquisition and satisfaction
- Streamlined customer journey of grid sign up process
- Ran usability testing sessions to gather insights.

May 2022 - July 2023

Relocation to Europe, Travel, and Further Study

During this time period I relocated to Germany, travelled, and completed a full time course with Career Foundry to progress my career, later leading to a job in Product Design.

July 2021 - April 2022

Learning Experience Designer - Sydney, Australia

Employer's Mutual Limited

When I began my role in the Learning Design team there was an issue with staff attrition. My role as a Learning Designer involved

- Complete re-design and development of 12 week onboarding program - deliverables included re-brand of internal communications designs, which led to nomination from the Personal Injury Education Foundation
- Presented and briefed with company executives to update on progress of training overhaul throughout re-design process
- Re-design led to improved retention rates of staff.

April 2019 - July 2021

Injury Management Advisor - Newcastle, Australia

Employer's Mutual Limited

UI/UX PROJECTS

[YourShare](#)

September 2022 - March 2023

- End to end design process to create high-fidelity prototype of a banking app

[Quick Vocab](#)

September 2022 - November 2022

- Design of high-fidelity prototype of more than 40 screen designs of a vocabulary learning app
